## Understanding Budget Definition for Sponsored Projects

This Addy Note explains the budget definition for sponsored projects with the addition of the Grants module. As of November 2019, direct and indirect rollups will default to the control parent ledger, CC\_PGRT\_PT. Child rollups will Track with Budget on ledger CC\_PGRT\_CH.

**Note:** Projects that need to be controlled at specific child budget categories will have different controls noted as an exception to this default. Related Content showing these exceptions on sponsored (research) project child budget ledger CC\_PGRT\_CH is now on the Budget Details page on UCF Financials.

**Note:** The image above shows all the budget items that have been defined for the project. If budget dollars (or a zero budget) has been posted, there will be a line for that account rollup. The default control is at the Direct (Account 720000) and Indirect (Account 782000) rollups. Only a few, or none of these individual budget items might be controlled as an exception to this default.
