

ADDY TIPS

Changes with System Maintenance (PeopleTools 8.55 Upgrade)

This Addy Tip will describe by section the changes that can be found in UCF Financials due to the new PeopleTools 8.55 upgrade.

Contracts

- A new “Use Project Costing ChartFields” checkbox is available. **NOTE:** UCF does **NOT** currently use this function.
- On the **Project Costing General Information** page, a “Project Hierarchy” link is available. **NOTE:** UCF does **NOT** currently use this function.

eProcurement

- Approvers will now see a **Header Comments** link, but there is no change to the existing business process. Requesters must continue to put any attachments that approvers need on Line 1.
- Requisitions in budget error status can now be canceled without first fixing the budget error.

General Ledger

- On the **Budget Overview** page, the **Save** button will now retain the ChartField values a user enters until that value is changed.
- On the **Budget Overview** page, ChartField descriptions now display along with numeric values.

Query Users

- The system now requires users to enter separators in any **Date field** in a query prompt. For example, the system will no longer recognize 11112017 as a valid date entry, but will accept 11/11/2017.
